

Liberty Mutual Benefits leverages EIS Group for a strategic state-of-the-art single business platform

- **Business Case:** Provide competitive advantages for group and individual life operations.
- **Challenge:** Replace a number of stand-alone systems to simplify data movement and consistency and to provide geographic and product scalability and cost efficiency, within an aggressive time frame.

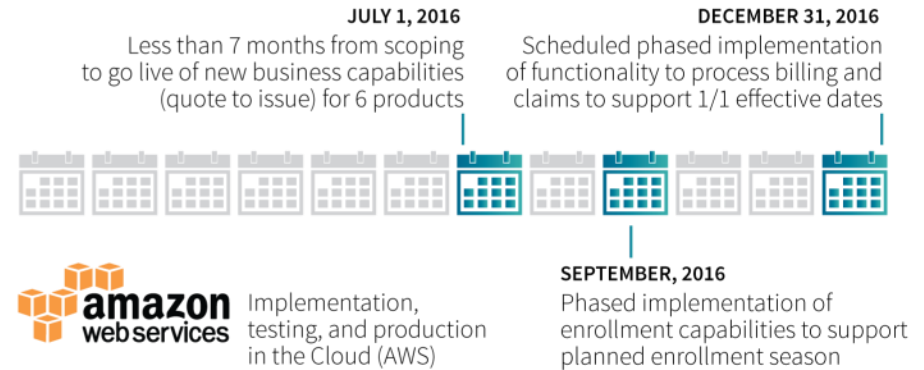

- Leverage EIS Group's EIS Core Insurance Suite™ to:
 - ✓ meet the unique needs of the company's benefits business unit
 - ✓ speed time to market
 - ✓ increase security
 - ✓ provide access from a range of devices
 - ✓ and offer bilingual capabilities

Project highlights:

- Delivered record-setting pace of 6 products to market in six months  Resulting in speed-to-market achievement and reductions in quote-to-issue timeframes
- Industry first core system implementation fully executed utilizing agile methodologies  Achieving nine parallel work streams
- Industry first core system deployed in the cloud  Realizing a 40% infrastructure costs savings

Implementation details:

Followed Agile methods which created a very tight alignment between business and IT.

Leveraged CI/CD (continuous integration/continuous delivery) environment to deliver functionality early and often to business users.

Deployed on Amazon Web Services to leverage world class security practices, speed time to market and provide visibility into operations.
